

I am totally against the FCC letting newLPFM stations take priority over cuurrent FM translators.

I listen to K-LOVE over this translator service. There is not a station like K-LOVE in our area. I feel so strongly about having a station of this quality that I support them financially so me and my family will have a quality radio station like this to listen to. This radio station stregthens the character of our community through the positive influence of Christian values they instill by the shows and music they have. It is in the best interest of the public that you don't take away this programming. Here we have a station that is listener supported and that would not be right to take that away and put in a station that we have no way of knowing if anyone would even listen to it and might, depending on the programming, drag down the moral character of our community. Please do not take away our radio station.

Sincerely,

James R Sandidge
